Re: GN Docket No. 13-5, Technology Transitions; GN Docket No. 12-353, AT&T
Petition to Launch a Proceeding Concerning the TDM-to-IP Transition; WC Docket
No. 05-25, Special Access for Price Cap Local Exchange Carriers.

Dear Chairman Wheeler:

I am President of KamRock Telecom, Inc. Our company has been around since 2002 and we are a broker of Telecom services through most carriers in the country. One of the most favored carriers in our wheelhouse, and the carrier we have our largest Master Agency with is with TDS Metrocom.

We rely heavily on the high quality phone and Internet services TDS Metrocom (TDS) offers our Company to enable us to provide first class treatment to our own customers. Without reliable access to the TDS products, our business would not survive. Regularly, we review *our* contract as well as the contracts of our clients and choose the provider that offers not only a competitive rate, but also the most reliable, high quality service.

For years, we have chosen TDS to provide services that meet and exceed our needs as well as our customer's needs. They are a competitive provider offering the individualized services and customer support our company desires for us and our customers

We strongly urge the FCC to continue to render decisions that provide customers with more choice when it comes to selecting a Telecommunications carrier who provides high-speed Internet and phone services.

As technology continues to evolve, and more services become IP-based, having access to more choices with companies like TDS will be critical to our business' success.

I thank you in advance for keeping the Telecom marketplace competitive so we can continue to offer multiple choices to our clients.

Sincerely,

Re: GN Docket No. 13-5, Technology Transitions; GN Docket No. 12-353, AT&T Petition to Launch a Proceeding Concerning the TDM-to-IP Transition; WC Docket No. 05-25, Special Access for Price Cap Local Exchange Carriers.

Dear Chairman Wheeler:

I am the President of TeleNet Communications. Our company has been around since 2013 and I've been in telecommunications industry for over 16 years. I started in the industry 2 years after deregulation of local phone services. I sell in the Twin Cities and some tier 2 markets in MN such as St Cloud and Rochester.

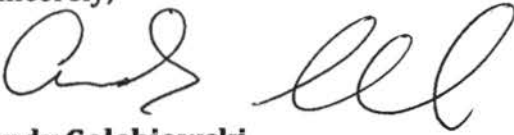

We rely heavily on the high quality phone and Internet services TDS Metrocom (TDS) offers our Company to enable us to provide first class treatment to our own customers. Without reliable access to the TDS products, our business would not survive. Regularly, we review our contract and choose the provider that offers not only a competitive rate, but also the most reliable, high quality service.

We have chosen TDS to provide services that meet and exceed our needs and our customers. They are a competitive provider offering the individualized services and customer support our company desires. They also assign local account managers providing local support which is becoming more rare in the industry.

Our company has limited options to sell in small markets due to limited competition. Our company focuses on bringing IP technology for voice and internet to our customers. We are becoming more and more limited due to the large carriers such as Century Link not allowing TDS to use their fiber network and other high speed internet products. We believe it's very important for the under-lying incumbent carriers to allow CLEC's access to their fiber and high speed internet for us to sell to small businesses at fair prices.

We strongly urge the FCC to continue to render decisions that provide customers with more choice when it comes to selecting a Telecommunications carrier who provides high-speed Internet and phone services.

Sincerely,
